

Privacy and Policy Management Practice

Well managed and defined policies are the cornerstone of any good information security program. In many respects it should be treated as the first, most critical component. From Acceptable Use Programs right through to Privacy legislation compliance, Montera provides guidance, direction and tools to assess, develop, implement and enforce effective privacy and policy programs in your organization.

Montera Privacy Service Offering

- Privacy and Compliance Consulting, Guidance and Direction
- Privacy Education and Awareness Programs
- Privacy Impact Assessments and Audits
- Privacy Program Design

VigilEnt Policy Centre

In partnership with NetIQ, Montera offers VigilEnt Policy Center (VPC) software to automate policy management and best practices by enabling you to create security policies, distribute them online, educate employees, and track and report compliance.

- Save countless hours in creating and updating policies using a library of more than 1,000 templates or import and update your existing policies.
- Review and distribute policies online across your organization easily and quickly via customized Web browser, assigning policies to specific roles and/or groups.
- Ensure people understand policies by educating them with conveniently accessed online quizzes that provide immediate scoring feedback.
- Track individual scores and policy compliance with summary reports showing who has read, understood, and agreed to comply with your security policies.
- Integrates with other VigilEnt Integrated Management Solutions to deliver a comprehensive enterprise security management system.
